

# FLU EXPRESS

*Flu Express* is a weekly report produced by the Respiratory Disease Office of the Centre for Health Protection. It monitors and summarizes the latest local and global influenza activities.

## Local Situation of Influenza Activity (as of Aug 28, 2013)

**Reporting period: Aug 18 – 24, 2013 (Week 34)**

- The latest surveillance data showed that the local influenza activity has increased.
- The Centre for Health Protection has collaborated with the Hospital Authority and private hospitals to monitor influenza associated intensive care unit (ICU) admissions or deaths (aged 18 years or above) since Jul 26, 2013. As of Aug 28, there were 23 cases of influenza associated ICU admission or death, in which 15 of them were fatal.
- Influenza can cause serious illnesses in high-risk individuals and even healthy persons. Except for those with contraindications, influenza vaccination is suitable for all members of the public.

### Influenza-like-illness surveillance among sentinel general outpatient clinics, 2011-13

In week 34, the average consultation rate for influenza-like illness (ILI) among sentinel general outpatient clinics (GOPCs) was 4.1 ILI cases per 1,000 consultations (Figure 1).

Figure 1 ILI consultation rate at sentinel GOPC, 2011-13

### Influenza-like illness surveillance among sentinel private doctors, 2011-13

In week 34, the average consultation rate for ILI among sentinel private doctors was 40.5 ILI cases per 1,000 consultations (Figure 2).

Figure 2 ILI consultation rate at sentinel GP, 2011-13

## Influenza virus detections (Laboratory surveillance), 2012-13

In week 34, the number of influenza viruses detected in the Public Health Laboratory Centre was 205, including 172 influenza A (H3) viruses, 26 influenza A (H1N1)2009 viruses and 7 influenza B viruses (Figure 3).

Figure 3 Influenza virus detections, 2012-13

## Influenza-like illness outbreak monitoring, 2012-13

In week 34, 3 ILI outbreaks occurring in schools/institutions were recorded. In the first 4 days of week 35 (Aug 25 to 28, 2013), 2 ILI outbreaks occurring in schools/ institutions were recorded (Figure 4).

Figure 4 ILI outbreaks, 2012-13

## Rate of influenza-like illness syndrome group in accident and emergency departments, 2011-13<sup>#</sup>

In week 34, the rate of the influenza-like illness syndrome group in the accident and emergency departments (AED) was 139.6 (per 1,000 coded cases) (Figure 5).

<sup>#</sup>Note: The influenza-like illness syndrome group includes codes such as influenza, upper respiratory tract infection, fever, cough, throat pain, and pneumonia.

Figure 5 Rate of ILI syndrome group in AED, 2011-13

## Influenza associated hospital admission rates and deaths based on discharge coding, 2011-13

In week 34, hospital admission rates with principal diagnosis of influenza for persons aged 0-4 years, 5-64 years and 65 years or above were 0.46, 0.03 and 0.35 cases respectively (per 10,000 people in the age group) (Figure 6). Weekly number of deaths with any diagnosis of influenza in public hospitals is also shown in the figure on the right hand side.

Figure 6 Influenza associated hospital admission rates and deaths, 2011-13

### Fever surveillance at sentinel child care centres/ kindergartens, 2011-13

In week 34, 0.63% of children in the sentinel child care centres / kindergartens (CCC/ KG) had fever (Figure 7).

Figure 7 Percentage of children with fever at sentinel CCC/ KG, 2011-13

### Fever surveillance at sentinel residential care homes for the elderly, 2011-13

In week 34, 0.13% of residents in the sentinel residential care homes for the elderly (RCHEs) had fever (Figure 8).

Figure 8 Percentage of residents with fever at sentinel RCHE, 2011-13

### Influenza-like illness surveillance among sentinel Chinese medicine practitioners, 2011-13

In week 34, the average consultation rate for ILI among Chinese medicine practitioners (CMPs) was 1.65 ILI cases per 1,000 consultations (Figure 9).

Figure 9 ILI consultation rate at sentinel CMP, 2011-13

### Enhanced Surveillance for Severe Seasonal Influenza (Aged 18 years or above)

- From Aug 21, 2013, 12:00 noon to Aug 28, 2013, 12:00 noon, 4 cases of influenza associated ICU admission were recorded, in which 2 of them were fatal.

Note: The data reported are provisional figures and subject to further revision.

## **Surveillance of severe paediatric influenza-associated complication/death (Aged above one month and below 18 years)**

- In week 34 and the first 4 days of week 35 (Aug 25 to 28, 2013), there were no new reports of severe paediatric influenza-associated complication/death.

Note: The data reported are provisional figures and subject to further revision.

## **Surveillance of Tamiflu resistant influenza A(H1N1)2009 virus infection**

- In week 34 and the first 4 days of week 35 (Aug 25 to 28, 2013), there were no new reports of oseltamivir (Tamiflu) resistant influenza A(H1N1)2009 virus infection. There are totally 35 reports of Tamiflu resistant influenza A(H1N1)2009 virus detected in Hong Kong since 2009.

## **Global Situation of Influenza Activity**

- In the United States (week ending Aug 17, 2013), the influenza activity remained low.
- In New Zealand (week ending Aug 25, 2013), the ILI consultation rate was below the baseline.
- In Singapore (week ending Aug 24, 2013), the number of consultations for acute respiratory infections was below the warning level.
